EDUCATION

Georgia Institute of Technology

Master of Science in Computer Science, Human-Computer Interaction Specialization

Starting Fall 2026

Western Governors University

Bachelor of Science in Computer Science

Admitted

Jan. 2026

University of California, Merced

Bachelor of Arts in Biology

May 2025

GPA: 3.7

PROJECTS

Funfetti Events Website Redesign

Case Study

Local Business Website Redesign

- Redesigned the website for a local event-planning and party-rental business, improving visual direction, service clarity, and the path to request a quote.
- Audited unclear calls to action, low logo readability, generic imagery, and navigation that did not prioritize booking.
- Iterated from an early structure prototype into a brighter final direction after stakeholder feedback called for more color and visual energy.
- Directed an AI-assisted responsive prototype in Codex, reviewing HTML/CSS/JavaScript output for service cards, gallery interactions, and quote-request flows.

Open Source San Jose Homepage Redesign

Live Demo

UI/UX Design Project

- Redesigned a nonprofit homepage to improve visual hierarchy, content organization, and call-to-action placement.
- Reorganized key homepage content around mission, community impact, programs, and clearer paths for visitors to get involved.
- Proposed responsive UI solutions focused on accessibility, information architecture, readability, and volunteer conversion.

Personal Profile Platform Feature Design

Live Demo

Product / UI Design Project

- Designed a responsive profile-link platform concept and used AI-assisted prototyping to explore layout, content hierarchy, and interaction states.
- Created editable profile states for colors, links, and layout choices so users could personalize the page without changing code.
- Reviewed and refined HTML/CSS/JavaScript behavior while focusing on navigation, responsiveness, and information hierarchy.

EXPERIENCE

IT Asset Management Coordinator

Mar. 2026 – Jun. 2026

ComputerCare

Stockton, CA

- Use NetSuite, ShipJunction, FedEx Ship Manager, and Jira to process device workflows, verify orders, and maintain records.
- Troubleshoot work-order discrepancies, check system records, and coordinate exception-based workflows with clear documentation.

People Analytics Extern

Aug. 2025 – Oct. 2025

Amazon Fulfillment Center Operational Strategy & People Analytics Externship

Remote

- Analyzed employee feedback using Python and AI-assisted workflows to identify pain points, workflow issues, and operational patterns.
- Synthesized findings into clear recommendations, strengthening technical communication and user-focused thinking.

SKILLS

Design: Figma, visual hierarchy, typography, responsive design, information architecture, accessibility principles, UI design

UX Process: user flows, wireframing, usability audits, heuristic review, interaction design, portfolio case studies

Prototyping: Codex, AI-assisted front-end prototyping, HTML/CSS/JavaScript literacy, responsive layout review, browser debugging

Tools: Figma, GitHub, Jira, Google Workspace, Microsoft Office, NetSuite, ShipJunction, FedEx Ship Manager
