Education

Georgia Institute of Technology Aug. 2026 to May 2028
Master of Science in Computer Science, Human-Computer Interaction Specialization

Western Governors University Jan. 2026
Bachelor of Science in Computer Science

University of California, Merced May 2025
Bachelor of Arts in Biology *GPA: 3.7*

Experience

General UI/UX Associate Sept. 2026 to Present
Digital NEST | Client: R.O.C.K. (Real Options for City Kids) *Stockton, CA*

- Refined mobile layouts across seven pages for a San Francisco youth nonprofit, collaborating with a senior designer and adapting desktop references into responsive Figma designs.
- Applied existing Figma components and typography to refine content hierarchy, image treatments, and navigation across program, donation, and volunteer pages.
- Created interactive browser prototypes with AI assistance in HTML/CSS/JavaScript, including donation selections, contact form feedback, and volunteer accordions.
- Incorporated senior designer feedback and checked responsive layouts, keyboard focus, and form behavior for design review and planned WordPress implementation.

Graduate Student Researcher Aug. 2026 to Present
Georgia Institute of Technology *Remote*

- Designing a mobile refrigerator inventory app intended to reduce tracking effort through camera assisted suggestions, manual entry, and clear confirmation and correction flows.
- Creating user flows, wireframes, and an interactive Figma prototype focused on usability, accessibility, and user control over automated suggestions.

IT Asset Management Coordinator Mar. 2026 to Jun. 2026
ComputerCare *Stockton, CA*

- Processed device workflows and maintained accurate records using NetSuite, ShipJunction, FedEx Ship Manager, and Jira; investigated discrepancies and documented exceptions.

Selected Projects

Funfetti Events Website Redesign Case Study
Local Business Website Redesign

- Redesigned an event planning and party rental website to clarify services, strengthen visual hierarchy, and create a clearer path to request a quote.
- Audited booking navigation and calls to action, incorporated stakeholder feedback, and directed a responsive HTML/CSS/JavaScript prototype using AI tools.

Open Source San Jose Homepage Redesign Live Demo
UI/UX Design Project

- Redesigned a nonprofit homepage around its mission, impact, and programs, refining content organization and calls to action for visitors seeking ways to get involved.
- Proposed responsive layouts and accessible navigation paths, using visual hierarchy to distinguish program information and participation opportunities.

Skills

Design: Figma, interaction design, responsive design, information architecture, visual hierarchy, typography
UX: User flows, wireframing, prototyping, usability audits, accessibility, design critiques
Technical: HTML/CSS/JavaScript, AI assisted prototyping, GitHub, Jira
