EDUCATION

Georgia Institute of Technology <i>Master of Science in Computer Science, Human-Computer Interaction Specialization</i>	Starting Fall 2026 <i>Admitted</i>
Western Governors University <i>Bachelor of Science in Computer Science</i>	Jan. 2026
University of California, Merced <i>Bachelor of Arts in Biology</i>	May 2025 <i>GPA: 3.7</i>

PROJECTS

Funfetti Events Website Redesign <i>Local Business Website Redesign</i>	Case Study
– Redesigned the website for a local event-planning and party-rental business, improving visual direction, service clarity, and the path to request a quote. – Audited unclear calls to action, low logo readability, generic imagery, and navigation that did not prioritize booking. – Iterated from an early structure prototype into a brighter final direction after stakeholder feedback called for more color and visual energy. – Built a responsive HTML/CSS/JavaScript prototype with service cards, gallery interactions, a quote-request modal, and a finished case study.	
Open Source San Jose Homepage Redesign <i>UI/UX Design Project</i>	Live Demo
– Redesigned a nonprofit homepage to improve visual hierarchy, content organization, and call-to-action placement. – Reorganized key homepage content around mission, community impact, programs, and clearer paths for visitors to get involved. – Proposed responsive UI solutions focused on accessibility, information architecture, readability, and volunteer conversion.	
Personal Profile Platform Feature Design <i>UI/UX and Front-End Project</i>	Live Demo
– Designed and developed a responsive profile-link platform using HTML, CSS, and JavaScript. – Created editable profile states for colors, links, and layout choices so users could personalize the page without changing code. – Implemented interactive customization while refining navigation, responsiveness, and information hierarchy.	

EXPERIENCE

IT Asset Management Coordinator <i>ComputerCare</i>	Mar. 2026 – Jun. 2026 <i>Stockton, CA</i>
– Use NetSuite, ShipJunction, FedEx Ship Manager, and Jira to process device workflows, verify orders, and maintain records. – Troubleshoot work-order discrepancies, check system records, and coordinate exception-based workflows with clear documentation.	
People Analytics Extern <i>Amazon Fulfillment Center Operational Strategy & People Analytics Externship</i>	Aug. 2025 – Oct. 2025 <i>Remote</i>
– Analyzed employee feedback using Python and AI-assisted workflows to identify pain points, workflow issues, and operational patterns. – Synthesized findings into clear recommendations, strengthening technical communication and user-focused thinking.	

SKILLS

Design: Figma, visual hierarchy, typography, responsive design, information architecture, accessibility principles, UI design
UX Process: user flows, wireframing, usability audits, heuristic review, interaction design, portfolio case studies
Front-End: HTML, CSS, JavaScript, responsive layouts, DOM interactions, Git, GitHub, browser debugging, basic SQL
Tools: Codex, Jira, Google Workspace, Microsoft Office, NetSuite, ShipJunction, FedEx Ship Manager
